Equine

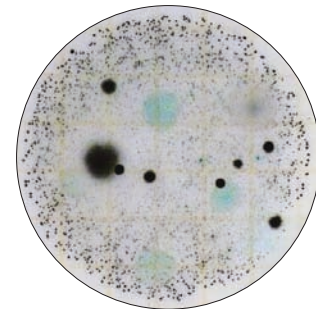

THE PROBLEM:

- 80% of horses stabled part of the time suffer from some airway inflammation, limiting their performance, even if asymptomatic
- More than 1 in 6 horses have actual respiratory conditions, affecting both health and performance
- Allergens found in hay lead to a number of respiratory diseases, including RAO/COPD and IAD/SAD
- The hygiene quality of hay is far more important to a horse's health than its nutritional value, due to modern feeding methods
- Spores in hay can also affect people, sometimes severely, from hay fever to Farmer's Lung
- Soaking hay does not kill spores, is messy and leaches out the hay's nutrients; moreover, its residue is an environmental pollutant

HAYGAIN microbiology test results

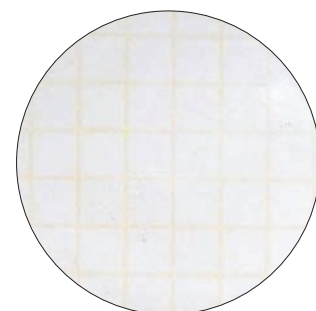

The science behind HAYGAIN has been extensively researched and tested at The Royal Agricultural College, Cirencester, led by Dr Meriel Moore-Colyer PhD BHSII, leading equine nutrition researcher and author. Our research is ongoing.

Before

Before HAYGAIN: the number of spore colonies grown from **one gram** of untreated good quality dry hay on a microbial media was **7.75 million**

After

After HAYGAIN: **zero spores**

THE SOLUTION: HAYGAIN hay steamers

HAYGAIN's unique distribution manifold enables steam to penetrate the hay from the centre outwards, ensuring total absorption. This is the only scientifically-proven method to reach the necessary high temperatures essential to kill all harmful fungal spores and bacteria.

HAYGAIN

hay steamers

WHY HAYGAIN?

- Scientifically-proven
- Kill all harmful fungal spores, mites and bacteria
- Produce totally dust-free and spore-free palatable forage
- Improve palatability of hay and re-hydrate it
- Completely and evenly steam a whole strung bale (HG-1000)
- Allow any quality of hay to be fed
- Accommodate whole strung bales, half bales, nets or wedges
- Are exceptionally user-friendly, even in the busiest yards
- Save water: use less than 3 litres of water per cycle
- Reduce loss of income
- Help save on vets' bills and treatments
- Provide a healthy alternative to haylage
- Make soaking hay obsolete
- Are endorsed by vets and wide-ranging field trials in all equine disciplines
- Outperform all other hay treatments

HAYGAIN HG-1000

WHOLE BALE

Dimensions:
L 1435mm x D 865mm x H 730mm

HAYGAIN HG-500

HALF BALE

Dimensions:
L 600mm x D 600mm x H 650mm

HAYGAIN technology and quality

- Unique steam distribution manifold design (patent pending)
- Thermally insulated for temperatures over 100°C
- Robust construction
- Weatherproof
- Stainless steel fittings
- Built-in thermometer
- Commercially-rated 7-litre steam generator with powerful 230v/2.75Kw heating element
- Unsurpassed quality
- British technology at its best

Steaming HAY to GAIN the competitive edge

TOM GEORGE, National Hunt Trainer

"The Propress Equine HAYGAIN horse hay steamer has been an absolute revelation. We feed 50+ horses on HAYGAIN-steamed hay, including our top performers Tartak and Racing Post Chase winner Nacarat. We had horses coughing which has now stopped completely and there have been absolutely no problems since our horses have been on the HAYGAIN-steamed hay. I can recommend it to everyone. We get improved performance from all our horses due to uninterrupted training schedules. It is a huge step forward for us and the industry."

MATT RYAN, International Event Rider and Triple Olympic Gold Medallist

"HAYGAIN hay steamers have revolutionised the way I feed hay to my horses. It's such a comfort knowing that our hay is so palatable and spore-free. Dust and spore-free hay is vital to any sport horse, and in particular my eventers. Very little water is needed and, as a result, there are more savings and less waste. It is also a much easier and less messy job than soaking."

PETER STORR, International Dressage Rider and Trainer

"I have found the HAYGAIN horse hay steamer an invaluable addition to my yard; it is an ingenious, easy way to feed guaranteed dust-free hay. Dressage horses have to perform as athletes and so it is essential that their respiratory systems are able to meet the demands of the challenging sport."

EMILY LEWELLYN, Young Gold Medallist Event Rider

"Our new HAYGAIN hay steamer is absolutely brilliant; we are really thrilled with it. It is proving hugely labour-saving and we are so pleased not to have to soak heavy hay nets anymore! It has enabled us to go back to feeding hay rather than haylage, which is cheaper, and the horses appear calmer and more trainable. We feed HAYGAIN-steamed hay at competitions as well as at home."

Don't just take our word for it – see www.haygain.com for further confirmation of HAYGAIN benefits

About Us

The HAYGAIN hay steamer was created and engineered by Propress, a world leader in specialised commercial steam appliances. With over 60 years combined experience in product design, development and manufacturing, we are also renowned for our unparalleled after-sales service and customer support.
